Carolina Sardi, *Untitled Drops*, 2023

**New York - Friday, March 31st** Cheryl Hazan Gallery is pleased to present *Last Chance*, a group exhibition celebrating the gallery's 25th year anniversary. This exhibition features several artists that have grown with our gallery and been a part of our vision and story over the past decades.

The show features over twenty artworks by artists Peter Demos, Rose Masterpol, Sarah Reynolds, Carolina Sardi, Thomas Stevenson, and Kazumi Yoshida. Artworks include paintings, works on paper and sculpture in wood and metal.

These artists and their artistic output are united in their organic quality of form that imitate the rhythms and colors of nature. The exhibition is a celebration of artists with a long-term commitment to the development of their art through their journey of self-discovery. We applaud each artist for their individual successes with gallery and museum exhibitions, critical reviews and editorials, and overall applause.

We are pioneers in Tribeca and have had the opportunity to see this neighborhood grow to what it is today. We open our doors to this incredible community of friends, family and collectors for shared interests and conversation.
