

## Hyunmee Lee

The artist's art practice crosses three continents over two decades. The works consider the images and ideas that mark my journey into the spiritual and cultural dimensions of painting as a creative activity. During a period when I have carried adventurous journeys across several different social and geographic divides, I began to search deeper for an understanding of who I am, and where I am. My paintings started to explore the idea of self as the most fundamental element of human nature; I tried to seek my identity as I examined human nature.
